 with 79.2% in 2016

INTERNSHIPS AND PROJECTS

Projects **DigiMarker**
DigiMarker is a Paper Evaluation project, demonstrating proficiency in web development and software engineering. Leveraged API Integration to connect the application to external data sources, enabling real-time information retrieval and data enrichment. Implemented Ajax to create a seamless and responsive user experience, reducing page reloads and enhancing interactivity. Demonstrated a commitment to writing clean and well-organized code, ensuring maintainability and scalability of the project. Skillfully managed the codebase using version control systems like Git, enabling efficient collaboration with the development team.
Skills used - Codeigniter Framework,PHP,MySQL,API Integration,Ajax,JSON,Javascript,HTML,CSS,Bootstrap

Paper Setter
The "Paper Setter" project facilitates clients in setting the question paper for their institutes prior to exams. It enables communication among examiners and higher authorities through an integrated chatbox within the project.
Role -Whole Project is Developed by me only.
Skills used - Codeigniter Framework,PHP,MySQL,API Integration,Ajax,JSON,Javascript,HTML,CSS,Bootstrap

SmartOSMCS
SmartOSMCS is an ongoing paper evaluation-based project currently under development. It employs Node.js and MySQL as the backend technologies, while React.js serves as the frontend framework. The project focuses on enhancing the efficiency of paper evaluation processes.
Role - Backend Developer.
Skills used - Node.js, Express.js, MySQL, API Creation, Swagger, Postman
